

Year R Home Learning Spring 2 - Animals

Please return home learning books by Monday 25th March 2024.

Last half term, we introduced home learning for Year R. After hearing parental views, we found that the home learning folder was difficult to use at home and this made it hard for children to showcase their learning! Therefore, we will now be using home learning books. Your child is encouraged to draw/stick/write in their home learning books to showcase the activities they have completed. As before, please try and complete at least two activities from below with your child and colour in the squares to show an activity has been completed.

Using the white square, decorate the front of your new home learning book!

Find out how to look after animals by visiting a pet shop, farm, zoo or friend who has a pet. Can you stick in a photo or draw a picture of you there?

Can you draw a picture or write the name of an animal or insect? How many legs does it have?

Practise reading these common words (words we can't sound out):

a	is	the	go
to	I	and	no
has	his	into	with
of	as		

Challenge: can you write any of these in your home learning book?

Make an animal creation! You might want to draw, stick or paint a picture in your book. Or you can even make a 3D model using junk modelling!

Read a book about animals. Where do they live and what do they eat? Come and share these with your friends and teachers!
